SUMMARY

Software engineer with 6 years of experience building data-driven web services and machine learning features.

SKILLS

Python, SQL, FastAPI, Flask, PostgreSQL, Redis, Docker, AWS, Git, scikit-learn, Pandas, NumPy, Agile

EXPERIENCE

Backend Engineer - BrightPath Analytics Mar 2022 - Present

- Built REST APIs with FastAPI and PostgreSQL serving 2 million requests per day
- Containerized services with Docker and automated deployments with GitHub Actions CI/CD pipelines
- Trained and shipped a churn prediction model using scikit-learn and Pandas, improving retention campaigns by 12%
- Mentored two junior engineers and led weekly code reviews

Data Analyst - Northwind Retail Jun 2020 - Feb 2022

- Wrote SQL queries and Python scripts to automate weekly sales reporting
- Created Tableau dashboards used by 30 store managers
- Cleaned and modelled data for demand forecasting experiments

PROJECTS

Document Q&A Assistant

- Built a retrieval-augmented generation app with embeddings, a vector database and an LLM API
- Deployed the FastAPI service in a Docker container

EDUCATION

B.Tech in Computer Science, State Institute of Technology, 2016 - 2020
